ORDER:

In the reference read above, the Engineer-in-Chief (R&B), State Roads, Hyderabad has stated that the "Chittoor-Kurnool Road is an important NH-18 connecting NH-4 on one end and NH-7 at other end at Kurnool and passes through district head quarters enroute. Tail end of the stretch from Km 358/0 to 362/0 runs in Kurnool city limits and is being maintained under State Roads. Particularly the stretch from Km. 358/0 to 360/0 runs through the heart of Kurnool Town abutting Government General Hospital, Collectorate, educational institutions, private nursing homes and number of commercial complexes. As such the traffic volume in this stretch is very high. He has further stated that Kurnool city is a Major Municipal Corporation, District Head quarters and Ex- capital of Andhra Pradesh. It is one of the fast developing cities in the State of Andhra Pradesh and gate way of Rayalaseema Region. As such the traffic volume through this city is very high. At Km 358/8 one Minor Bridge is existing across K-C Canal. The width of the Bridge is 14.50 Mts and is unable to cope up with the ever increasing vehicular traffic. The existing carriageway width on either side the Bridge is 18.00 Mts and it is going to be widened to 30.00 Mts. As such the Bridge has become a bottle neck and vehicular traffic on either side of the Bridge gets stranded up very frequently. Hence it is proposed to construct a Minor Bridge to a width of 12.00 Mts abutting the existing one for smooth vehicular traffic. With 3 vents of 10.00 Mts effective span. Hence, He has submitted estimate for Rs.2.00 Crores for the above work.

2.
